The undersigned owners of property in Columbia County petitions the Board of Commissioners to allow the re-naming of a private road. This roadway is associated with its currently designated name for the street addressing program. We understand that this petition would allow for the installation of a road name plate for the identification of a private road in Columbia County for the purpose of emergency vehicle response and postal delivery, and that this petition, if approved, does not obligate the County in any way towards the maintenance, repair or replacement of the roadway and does not imply the future acquisition of the roadway in question for public use or ownership, and does not exempt future subdivision of land unless the subdivision conforms to the regulations established in Chapter 2-13 of the County Code.

Furthermore, we understand that a minimum of 75% of the property owners possessing property that borders the private roadway must concur with the suggested name. The road name will be reviewed by the appropriate agencies to ensure no conflicts exist.
